The Status of the Aging HIV Epidemic: Inflammation, Multi-morbidity and Accentuated Aging

Care of the Aging HIV Patient. (Full text. Cleveland Clinic Journal of Medicine)

Aging, Inflammation, and HIV Infection. (Full text. Topics in Antiviral Medicine)

Systemic Effects of Inflammation on Health During Chronic HIV Infection. (Full text. Immunity)

Aging with HIV Infection: A Journey to the Center of InflammAIDS, Immunosenescence and NeuroHIV. (Immunology Letters)

Inflammatory Co-morbidities in HIV+ Individuals: Learning Lessons from Healthy Ageing. (Current HIV/AIDS Reports)

Inflammation and Gut Leakage Remains Elevated in People with HIV Despite Early Antiretroviral Treatment (Aidsmap)

Older HIV-infected Patients on Antiretroviral Therapy Have B-cell Expansion and Attenuated CD4 Cell Increases with Immune Activation Reduction. (Full text. AIDS)

Time Trends for Risk of Severe Age-related Diseases in Individuals with and without HIV Infection in Denmark: A Nationwide Population-based Cohort Study. (The Lancet)

Cross-sectional Comparison of the Prevalence of Age-associated Comorbidities and Their Risk Factors Between HIV-infected and Uninfected Individuals: The AGEhIV Cohort Study. (Clinical Infectious Diseases)

Initiation of ART during Early Acute HIV Infection Preserves Mucosal Th17 Function and Reverses HIV-Related Immune Activation (Full text. PLoS Pathogens)

Multimorbidity and Functional Status Assessment. (Current Opinion in HIV and AIDS)

Neuropathogenesis of HIV-associated Neurocognitive Disorders: Roles for Immune Activation, HIV Blipping and Viral Tropism. (Current Opinion in HIV and AIDS)

The Effects of HIV and Aging on Brain Functions: Proposing a Research Framework and Update on Last 3 Years’ Findings. (Current Opinion in HIV and AIDS)

Interactions between Ageing and NeuroAIDS. (Current Opinion in HIV and AIDS)

HIV Infection, Cardiovascular Disease Risk Factor Profile, and Risk for Acute Myocardial Infarction. (Journal of Acquired Immune Deficiency Syndromes)

Cardiovascular Disease Risk in an Aging HIV Population: Not Just a Question of Biology. (Full text. Current Opinion in HIV and AIDS)

Aging and HIV/AIDS: Pathogenetic Role of Therapeutic Side Effects. (Full text. Laboratory Investigation)

Immunosenescence and Aging in HIV. (Current Opinion in HIV and AIDS)
Emerging Clinical Issues Related to Management of Multiorgan Comorbidities and Polypharmacy. (Current Opinion in HIV and AIDS)

Comparison of Risk and Age at Diagnosis of Myocardial Infarction, End-stage Renal Disease, and Non-AIDS-defining Cancer in HIV-infected versus Uninfected Adults. (Clinical Infectious Diseases)

HIV-related Metabolic Comorbidities in the Current ART Era. (Infectious Disease Clinics of North America)

Is HIV a Model of Accelerated or Accentuated Aging? (Full text. The Journals of Gerontology)

Interleukin-6, High Sensitivity C-Reactive Protein, and the Development of Type 2 Diabetes Among HIV-Positive Patients Taking Antiretroviral Therapy. (Journal of Acquired Immune Deficiency Syndromes)
